

North Routt Fire Protection District Awarded a Colorado State Forest Service 2024 Forest Restoration and Wildfire Risk Mitigation (FRWRM) Grant

The Fire Protection District (FPD) received a FRWRM grant to assist property owners with wildfire mitigation. Starting in 2024 and going through 2027, this grant will provide funding to assist landowners to reduce hazard fuels reducing wildfire risk on their properties. The 2023 Routt County Wildfire Protection Plan (CWPP) identifies needs for wildfire protection in the county, and lists priorities to protect communities from wildfire including hazard fuels mitigation.

This grant provides a 50/50 match for landowners for hazard fuels removal. Landowner in-kind match can be completed in various ways including labor. The FPD will be working closely with the Colorado State Forest Service to provide technical support to assist landowners to implement this grant. More information will be posted on our website, Facebook page, or contact us.
